READING

- Reading takes us places. It is the heart of 4th grade.
- We have a goal for each child to read **40** books this year. At least 20 minutes of reading at home per night is expected to help achieve this goal. Carry books with you and take advantage of unused minutes in the car, waiting for events, etc.
- Please help your children have access to a variety of books and reading material. Talk to them about their reading.
 - The Kamas Library is a great resource. They will find books on loan or order new books if you ask. Borrow books from our classroom.
 - Park City Library usually has a great used book sale over Labor Day weekend.
 - Visit thrift stores, shop bookorders and bookfairs, get reading incentive books from Barnes and Noble.
 - Talk to me about ways to help your individual child.

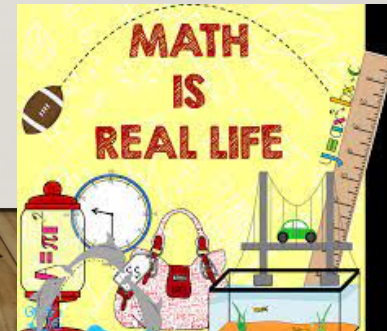

You're Going Places!

MATH

- 4th Grade math is challenging! We have amazing smart students who can do hard things!
- We use class time for direct instruction and practice. I will assign homework practice sheets, IXL, or iReady frequently for homework. IXL will work on any desktop, laptop, phone, or tablet. Let me know if you have technology issues.
- Math facts need to be solid. This will make math easier for years to come. Reflex math can be accessed at home for math fact practice as well as the fluency part of ST Math. Use flash cards, count by 6, 7, 8's etc. when you are in the car, listen to Youtube multiplication songs, or practice speed timings.
- Other Homework will be on an as needed basis.
- Please take advantage of at-home learning opportunities communicated through class newsletters.
- Have students use math in real life: cooking, money, measuring, etc.

SCIENCE AND SOCIAL STUDIES

- Take advantage of the many learning opportunities Utah offers in nature, museums, recreation, wildlife, etc. Point out geography, counties, interesting places.
- Look for resources I'll send through e-mail such as the 4th grade National Park pass and museum free days.
- Some home studying will be required to do their best on science tests.
- Students will need to study for Utah Citizen tests and there will be a couple optional projects.
- We have some fabulous themed learning days and field trips planned to help students have hands-on-learning. We are planning to visit This is the Place on September 2nd

CLASSROOM HELP

- We love to have parents be involved in our classroom.
- We can use volunteers to help with reading, math, etc. The best time is daily from 10:05-11:05. Please let me know if you are available during these times or another time that will work for you. Consider sharing your personal expertise; jobs, travel, places you've lived etc.
- Volunteer for field trips and class learning celebrations. Sign-up e-mails will be sent using Sign-Up-Genius. Thinking ahead: Let me know if you have particular things you would like to plan for Mad Scientists experiments, Native American crafts, Pioneer crafts, Rendezvous, Valentine service projects, etc.

BIRTHDAYS

- Student are welcome to bring a treat or small surprise for their birthdays. This is optional. We will celebrate in class with or without treats.
- Please let me know if your child has any allergies or diet restrictions.

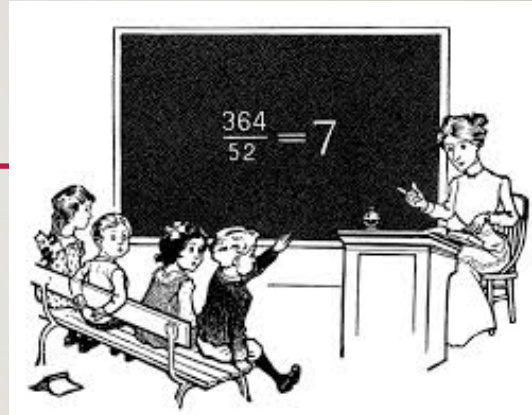

Another trip around the sun.

ATTENDANCE IS IMPORTANT!

- We always fill our time with important learning!
- If students aren't here they are missing out.
- If students need to miss school we will collect work in an absent folder. They will need to complete missed work at home. Long term absences will have assignments in Google Classroom.
- Please communicate with me if your student will be missing

school.
Everyday is an Adventure!

SPECIALISTS

- This is our specialist schedule. This will help you to know when students should wear gym shoes, bring library books, etc.
 - MONDAY - P.E.
 - TUESDAY - MUSIC
 - WEDNESDAY - LIBRARY
 - THURSDAY - COMPUTERS
 - FRIDAY - ART
